## WORK EXPERIENCE (TATA CONSULTANCY SERVICES)

### 1. **dbEagle(MIS and Risk Management tool)**

Customer: Deutsche Bank

Role: Developer (Oct 2014-Sept 2015)

dbEAGLE is web based composite application for CMS users to access customer documentation online and provide consultancy based on real time customer portfolio view. It also helps higher management with readily available various MIS reports.

#### Accountability

- Creation of high and low level design document, creation and modification of new and existing database objects like tables, packages etc by referring functional design document.
- Helping L3 and L2 with sql statements to resolve production data issues, managing DEV, SIT, UAT databases
- Deployment of codes from lower to higher environment

### 2. **Reconciliation Migration form IMHOTEP to TLM**

Customer: Deutsche Bank

Role: Technical Analyst, Developer (Feb 2013 to Oct 2014)

The primary objective of this project is to Cost to Achieve by migrating legacy tool to TLM, and match the trades in Primary and Secondary Market. Unmatched trades have to move to various queues for impact- cause analysis. Matching has to be done with Transaction Lifecycle Management (TLM) tool. It includes generation of target files from source file (ETL process) and then to use these files in TLM tool for matching.

#### Accountability

- Analysis of source code of legacy system, Preparation of as-is technical analysis document
- Preparation of to-be design document.
- Preparation of informatica transformation and mapping document.
- Development of oracle stored procedures wherever necessary.

### 3. **JPMC CAS EURC -Offshore (TITAN)**

Customer: JPMC

Role: Developer (August 2011 to December 2012)

Global intranet based Charge & Inventory reporting tool, which is fed with data from 60+ inventory systems on a monthly basis.

#### Accountability

- TITAN system receives around 20 feed files from different systems in various formats.
- We load these files data into database tables.
- Have to do the changes in the Sybase procedures depending on the change requests.

### 4. **JPMC IB Equity Comp QA Off**

Customer: JPMC

Role: Tester (July 2009 to August 2011)

Compliance QA is responsible for testing of report generated by JPMC and to process and send these reports successfully to FINRA test site.

#### Accountability

- Generating test reports by running Unix scripts and testing for error
- Sending the reports to FINRA test site, validating the format and data of the report.
